PROFESSIONAL SUMMARY

UX/UI Designer with 9 years of experience and a background in responsive web design and frontend development, translating business requirements and user needs into practical digital experiences. Collaborates with business teams, stakeholders, project managers, and developers from feature research through implementation review. Skilled in Figma design systems, HTML/CSS, and AI-assisted design-to-code using Codex and Figma MCP integration.

CORE SKILLS

UX/UI Design: Feature research, user flows, wireframes, high-fidelity UI, responsive design, and interactive prototyping.

Design Systems: Figma Auto Layout, reusable components, variants, variables, design tokens, and component documentation.

AI-Assisted Design-to-Code: Codex and Figma MCP integration to translate designs into interactive coded prototypes.

Frontend Collaboration: HTML, CSS, technical feasibility discussions, developer handoff, design QA, and pre-release UI testing.

Additional Tools: Adobe Illustrator, Photoshop, InDesign, After Effects, Adobe XD, Codex

---

LATEST UX/UI EXPERIENCE

Senior UX/UI Designer

Oct 2017 - Nov 2026

Reeracoen Tech Co.,Ltd. · Bangkok, Thailand

- Collaborated with business teams, stakeholders, project managers, and developers to clarify requirements and align design decisions with user needs, business goals, and technical constraints.
- Researched requested features and relevant UX patterns to inform design proposals and clarify interface requirements.
- Translated requirements into user flows, wireframes, high-fidelity interfaces, and interactive prototypes in Figma.
- Built and maintained reusable UI components and design system documentation using Figma Auto Layout, components, variants, variables, and design tokens.
- Translated Figma designs into interactive coded prototypes using Codex and Figma MCP integration to explore UI behavior and support stakeholder and developer reviews.
- Reviewed and tested frontend implementations before production release, documenting usability issues, visual inconsistencies, and interaction defects and working with developers to resolve them.

EARLIER PROFESSIONAL EXPERIENCE
